

StayRight and Secure Hosting and Support Plan

THE DETAILS

Tech Stuff

Secure Hosting: Your website is hosted on our Enterprise Level Servers which include 5GB Storage for your website, 20GB of Bandwidth to handle your traffic, and **Multiple Daily Backups** to keep your site safe. Your site comes with a shared IP SSL cert by default, adding a Dedicated IP high-level SSL is encouraged.

Email: Your account comes with (3) 25gb business grade email accounts, compatible with email client access such as Outlook, PLUS Webmail access, and Smartphone access. Pro SPAM filtering, daily backups and more included. Each add. user is just \$5.00 each. MS Office 365 or Google Suite available upon request, additional fees apply.

Pro-level Protection & Full Time Monitoring: We make sure your site is protected and working properly. Monitoring your account is important to your business so you can catch errors including but not limited to hacking issues, page speed, error messages, customer login process, broken links, and more.

Software Upgrades (WordPress Sites Only): We monitor your site with WP Manage and periodically update your site's software to ensure proper function and security.

Ongoing Browser Support: We'll make sure that your site is always compatible with the latest browsers. We try to be proactive on this, however we cannot do this automatically. You'll need to let us know if you notice something and we'll get right on it!

Mobile Device Support: This is where the insurance comes in. We'll be sure that your site can be viewed properly on any mobile device, phone, tablet or desktop. (Up to 1200px wide)

Rocket Caching & Image Compression: Your site will load faster with *Rocket!* caching and optional image management.

Direct IT Level Tech Support: We provide up to 30 minutes of phone support upon request.

MARKETING

NationalBusinessList.com: Google likes inbound links, so no better way to help you get found than to list your company and website on our business directory. More bait in the water means you catch more fish!

Google My Business: GMB will help build your online presence across Google including Search and Maps. We will claim your Google My Business if necessary and help set it up properly.

TRACKING AND REPORTING

Google Analytics Reporting: We will install Analytics and email you a custom monthly site report that gives great stats on your website's traffic.

Call Click Tracking: Integrated with Google Analytics, call click tracking tracks every time someone clicks or taps (for mobile users) on the number on your website.

THE BEST FEATURE - 20% off all future web services!
